

The First Bonus

For the first bonus, Carlos and I implemented the drop down pins on the map, and when the drop down pins are clicked the longitude and latitude of the location appears on the screen.

The Double Bonus

For the double bonus we implemented options that allow the user to be able to choose the type of map. The user will be able to choose from the hybrid map, the road map, the satellite map, and terrain map.

Point Values

First Bonus points = 5pts

Choosing MapType = 5pts

Total = 10pts
